Recommended Protective Coverings For Your Ophthalmic Instruments

ZEISS PLEX Elite 9000

Seeing beyond

With the health and safety of you, your patients and your staff in mind during the COVID-19 pandemic, ophthalmic practices are advised to take extra precautions to prevent the spread of germs by using protective coverings on equipment when at all possible.

Forehead Rest
Start with the forehead rest cover.

Chinrest and Handle Grips
Next, cover the chinrest and the handle grips.

Mouse and Keyboard
To protect the operator of the device, cover the keyboard and mouse.

Using a single-use protective covering may help put your patient at ease and demonstrate your commitment to their health and well-being. Below, you'll find a list of ***suggested*** protective products to help facilitate a hygienic environment.

These products are recommended to be used as single-use disposables and should be changed after each patient visit. Simply slip the sleeves on before the patient arrives, and remove and replace them before your next patient exam.

Component	Barrier Type	Vendor*	Product*
Forehead Rest Chinrest	Polyethylene Film 4 x 6 in	Dental Office Products Noble Dental Supplies Dental Savings	D435-0002-CL 100-2102 BAR00-CLEAR
