

Win a \$1,000 Scholarship from the ZEISS Academic Program

and Free CMM Calibration for Your Institution

Seeing beyond

Past ZEISS Scholarship Winners

You can win! Simply answer the question: How has ZEISS metrology improved your education and future employment opportunities? Share your experience for a chance to win one of five (5) scholarships.

We're awarding \$1,000 scholarships. Five students who create a video that best answers that question will win a scholarship from ZEISS. You have until December 15, 2023, to submit your video. Based on previous participation, we are expecting around 40 submissions, so your chances of winning are very good.

It's easy to do. If you're currently enrolled in a program that uses ZEISS metrology equipment, you can participate in the contest (see complete rules and regulations). Just submit a simple, yet creative 1 to 2-minute video describing how the use of ZEISS metrology in your institution's metrology, machining or engineering program has helped you!

And there's more! The institution with the student whose video, judged to be the best, will win a calibration for their ZEISS CMM. That student will also win an additional \$500.

Applicant and Video Requirements

- Applicants must be part-time or full-time students currently enrolled and active in a post-secondary accredited institution’s metrology, machining or engineering program using ZEISS metrology equipment.
- Applicants must have direct knowledge of or skills using the ZEISS metrology instrument(s) in the program at their institution.
- Applicants must submit their videos individually. One video per applicant.
- Video guidelines: 1–2 minutes in length, simple yet creative, in Full HD quality (1920 x 1080), using a digital camera or phone camera.

Scholarship Awards

The top 5 videos, judged by ZEISS, will determine the winners of the five \$1,000 scholarships. Once all 5 winners are selected, the best video of the 5 wins a CMM calibration for their institution. The student with the best video wins an additional \$500 award.

Suggested Outline

- **Introduction** – Include an introduction of yourself, the institution name and the program of study. Also, include information about the ZEISS equipment used in the program.
- **Body** – Clearly describe how the equipment and software is being used in your program. Include examples of your understanding and/or skills in metrology. In other words, what have you learned?
- **Conclusion** – Comment on what’s next in your education or career interest related to metrology or quality manufacturing and how you plan to put your knowledge to work.

Judging Credentials

A committee of judges will select the top 5 videos based upon content, presentation and clarity of message. Winners will be chosen as the videos are submitted. Judges are ZEISS employees well-versed in metrology and ZEISS equipment.

Submission

All videos must be submitted before **December 15, 2023**. See the web page at www.zeiss.com/zeiss-academic-program for rules and regulations.

Submit your video via: <https://spaces.hightail.com/space/RVapsZ55HN> along with this form with your information filled out.
