**Foldable Tube f170/f260**  
An Ergonomic Breakthrough

We make it visible.

## An Ergonomic Breakthrough

The Foldable Tube f170/f260 combines brilliant apochromatic optics and a unique design for maximum visualization flexibility, magnification potential and positioning adaptability. It allows surgeons a wide range of comfortable working positions, even at extreme surgical approach angles.

*The tube's 360° rotation allows excellent positioning flexibility*

## Greater Comfort

The Foldable Tube f170/f260 introduces a high level of comfort:

- **Rotate the tube easily** without moving the microscope head using the integrated 360° rotation function. No need for external rotating adapters reducing microscope head build height.
- **Work ergonomically** by reducing or increasing the distance to the required treatment field thanks to the patented multi-link design.
- **Easily compensate for eye level differences** between the surgeon and the assistant when operating in a face-to-face configuration by simply rotating the tube.

The Foldable Tube f170/f260 can be combined with most OPMI® surgical microscopes from Carl Zeiss.

- 1.), 2.) Easily adjust angle, length and height as needed  
3.) Relaxed working position due to eye level height relative to arm posture  
4.) Move the microscope head effortlessly via the attachable mouthswitch  
(only available for OPMI PENTERO® 900 and OPMI Pentero)

## Greater Detail

Apochromatic optics from Carl Zeiss offer surgeons outstanding visual clarity:

- Instantly yield a **50% magnification** gain for delicate and detailed procedures with the integrated PROMAG™ function.
- Choose between **optimum magnification** and **maximum field of view** with a quick turn of the knob

PROMAG for additional 50% detail magnification
