How do I upgrade my CIRRUS HD-OCT Review Software?

Prior to ordering and upgrading CIRRUS™ HD-OCT Review Software, refer to the document Appendix: Installing CIRRUS HD-OCT Review Software to ensure compatibility between your computer operating system, the CIRRUS HD-OCT Review Software and the CIRRUS Instrument.

Software Media Package
To upgrade your already configured and running CIRRUS HD-OCT Review Software, you must first order and receive the CIRRUS HD-OCT Software Media Package, which contains two USB drives with everything you need to complete your software upgrade. The USB drives will be labeled SW [Software] and UD [User Document] (Figure 1).

Software Upgrade
Insert the SW drive into any open USB port on your exam lane review station computer, click on the Windows Explorer folder icon located in the menu bar (Figure 2), and then click Computer on the far left (Figure 3).

In the next window, you will see the CIRRUS drive listed with the software version number; double click the icon (Figure 4), and then double click the setup.exe icon (Figure 5) to begin installation of your CIRRUS HD-OCT Review Software upgrade.
How do I upgrade my CIRRUS HD-OCT Review Software? | ZEISS Quick Help: CIRRUS™ HD-OCT

When the Welcome Screen appears, click Next (Figure 6), accept the terms of the agreement and click Next.

If you are NOT using FORUM® Data Management software from ZEISS:
Select CIRRUS Review – Instrument Mode. When the installation is complete, click Finish (Figure 7). Your computer will automatically reboot. No further action is required if you are upgrading your software from a version that was already configured and running.

![Figure 7](image2)

If you ARE using FORUM® Data Management software from ZEISS:
Select CIRRUS Review – Local Mode / FORUM Archive and click Next (Figure 8). Click Next again on the following screen without making any selections. The box “Remote Desktop Services will be used” should be left unchecked (Figure 9). Consult your local IT professional if you wish to install your CIRRUS HD-OCT Review Software for Remote desktop services use.

Database Installation Directory

You will be prompted with an option to change the installation directory of the CIRRUS HD-OCT Review Software database location (Figure 10). Unless you wish to make a change, leave the directory as-is and click Next.

Note: The database installation directory screen will not appear in a Non-Forum install. If you would like to change the location of the installation directory, first consult your IT professional. The directory can be moved to a different local drive location but must remain on the local computer.

When the upgrade installation is complete, click Finish (Figure 11). Your computer will automatically reboot. No further action is required after the reboot if you are upgrading your software from a version that was already configured and running.

Refer to the CIRRUS HD-OCT User Manual Instructions for Use for safe and effective operation of the instrument.
