## Firmware Update - Version 1.4

ZEISS ZX1

## ZEISS ZX1 - Firmware 1.4 - Release Note

We would like to sincerely thank our trusted community and the professional media for the extensive feedback we have received since the release of the ZEISS ZX1!

We appreciate the feedback from our customers and are committed to meeting their expectations in the best possible way both now and in the future.

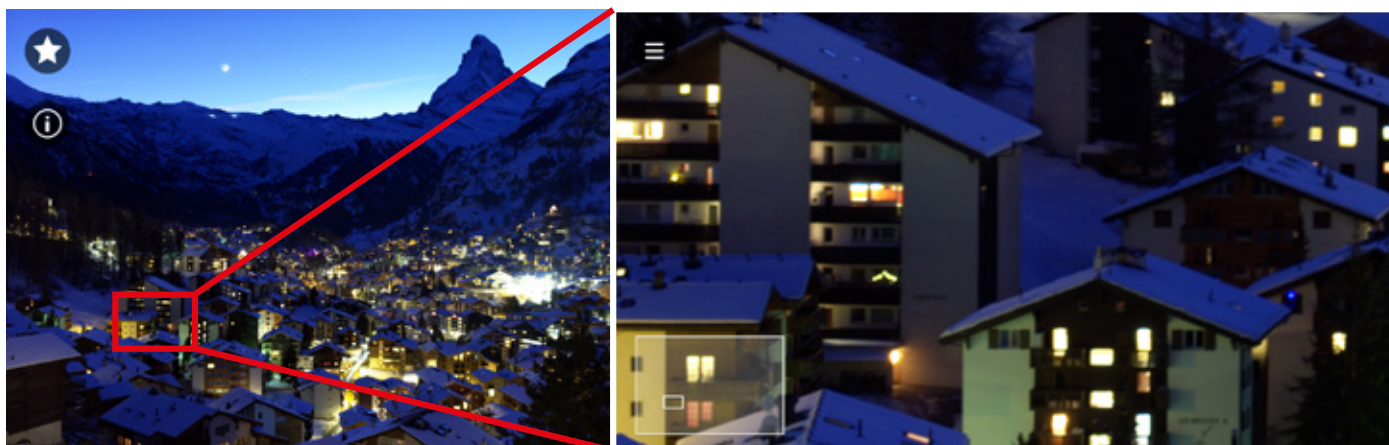

With this firmware update (1.4), we have added some new features to the ZEISS ZX1 as well as fixed some issues:

### New features:

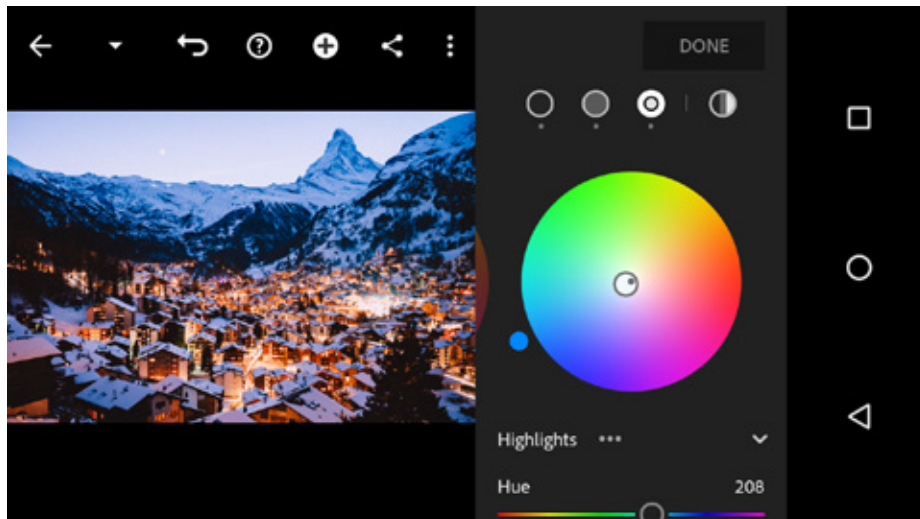

- Autofocus with face detection
  - Selecting the recognized face to focus in live view is possible
  - This new AF area mode works simultaneously with both AF-Single and Continuous mode

- Full-res DNG rendering in Gallery mode
  - Magnification up to 100% with full detail representation from the Gallery when shooting in RAW format

- Adobe Lightroom™ (V6.2)
  - New Lightroom version integrated

- Support of the ZX1 Companion App for iOS and Android
  - Remote control of camera with live preview streamed on smartphone
  - Geotagging function via smartphone GPS

- Support for multiple recipients when sharing via link or email
- Auto-completion for known email addresses
- New languages: French, Italian and Spanish are supported

#### **Bug fixes/improvements:**

- AF consistency further improved
- Battery consumption in sleep mode reduced
- Support for special characters in usernames for FTPS server connections

**Do you have any questions? We are happy to help you.**
