

Our commitment to safety, health, and the environment

At DORC – Dutch Ophthalmic Research Center – our mission is to improve the vision of patients worldwide by developing and producing innovative ophthalmic solutions. We can only achieve this mission in a safe, healthy, and sustainable working environment. We consider Environment, Health & Safety (EHS) to be an integral part of our operations, products, and culture.

Working together to achieve the highest EHS standards

We believe that the highest EHS standards are indispensable to our success. We comply with all relevant laws and regulations and go beyond where possible. At every step of our production process – from design and procurement to manufacturing, distribution, and service – we minimize our environmental impact, control risks, and ensure safety. Continuous improvement is our standard.

Working together for a safe and healthy work environment

A safe and healthy work environment is the foundation of our success. By ensuring ergonomic workplaces and promoting a culture of safety and well-being, we enable our employees to work with precision and focus on products that improve patients' vision. We invest in prevention, training, and innovative technologies to minimize risks and promote well-being. For us, safety and quality go hand in hand and are inseparably linked to everything we do.

Working together on engagement and dialogue

We believe in engagement and open dialogue. We foster a culture where employees, partners, and suppliers feel free to share ideas, identify risks, and suggest improvements. By working together and maintaining active conversations, we build a strong safety culture where everyone takes responsibility for EHS.

Working together on responsibility for people and the planet

We believe in responsibility for people and the planet. As an internationally operating manufacturing company, we use resources efficiently, reduce waste, save energy, and cut emissions. We invest in sustainable technologies and processes that contribute to a healthier planet for current and future generations.

Our Responsibility

At DORC, we aim to be a role model in the field of environment, health, and safety. We do not see EHS as an obligation but as a core value embedded in our mission to help patients see again.

Our Management
