ACCUJECT 3.0-1P injector set with
ZEISS CT SPHERIS 204 & CT ASPHINA 404
high diopter range
Handling instructions
ACCUJECT™ 3.0-1P injector set is compatible with ZEISS CT SPHERIS® 204 +31.0 to +45.0 D and ZEISS CT ASPHINA® 404 +31.0 to +42.0 D

1. Inject OVD into the cartridge tip and along the channels.

2. Place the IOL in the center of the open cartridge. Use forceps to push down on the edges of the optic to ensure that the optic and haptics are positioned under the ledges of the cartridge.

3. Maintain the IOL in place with the folding forceps while closing the cartridge. Take care that the haptics do not slip out from the cartridge grooves between the wings.

4. Advance the plunger until it begins to move the IOL forward and ensure that it is moving freely.

5. To control the release of the IOL from the tip, slow down the movement of the plunger when the optic portion of the lens reaches the beveled end of the tip.
