Seeing beyond

ZEISS Digital Ordering Platform

Order our IOLs and other ZEISS medical products easily online

Our digital ordering platform simplifies and streamlines your ordering process, thereby reducing administrative effort and creating more time for the essential tasks of your daily work. In addition, the personal log-in area enables you to monitor your consignment stock, track your orders and schedule your surgical procedures more easily.

Order Lenses

Simplify the purchase of customized lenses, as well as additional lenses to your defined consignment stock.

- ✓ Enter lens details, specify diopter range and cylinder
- ✓ Provide additional information directly to ZEISS
- ✓ Add to shopping cart and submit your order

Order Consumables

Easily select and order OVDs, injectors, phaco accessories and other small parts.

- ✓ Enter product name into search field
- ✓ Check availability of your preferred item
- ✓ Add to shopping cart and complete your order

Track Deliveries

Keep full visibility on your orders, deliveries & shipments.

- ✓ Check your order status
- ✓ Track your shipments
- ✓ View your order history and delivery notes

Bill & Replace Lenses

Inform ZEISS about your implanted lenses and order replacements according to your needs.

- ✓ Scan and report implanted lenses for billing
- ✓ Indicate if lenses should be replaced
- ✓ Provide optional information such as patient ID and surgery date

Manage Lens Inventory

Optimize your inventory management for ZEISS products.

- ✓ View your lens consignment stock online
- ✓ Easily search, filter or sort by product name, serial number or expiry date
- ✓ Connect with your consumption page to trigger an implantation notification

For more information visit:
zeiss.com/digitalordering
or contact your account manager.

Also available as app on the Google Play Store.

Covering the entire spectrum

Tailored to your needs

Discover the ZEISS IOL, OVD and Injector Portfolio developed to meet patients' needs and surgeons' preferences. Innovation and precision are combined to provide an extensive range of cataract consumables and cataract implants, covering the entire spectrum of monofocal, multifocal, bifocal, toric, EDoF and trifocal lenses. It includes well-known IOL shapes like C-loop and 4-haptic, with hydrophilic or hydrophobic lens properties.

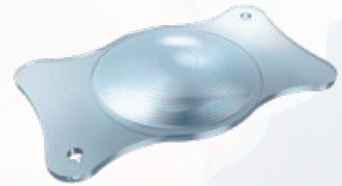
The ZEISS IOL Portfolio

Toric IOLs

- Broadest range of toric IOLs on the market
- Precise IOL selection out of approx. 2000 options through 0.5 D increments and up to 12 D in cyl
- Proven rotational stability[1] through advanced 4-haptic design

Multifocal IOLs

- Bifocal and trifocal
- Spectacle independence at all distances
- Excellent contrast sensitivity at all distances and under all light conditions
- Proven clinical outcomes reported in > 75 peer-reviewed publications



EDoF IOLs

- A wide range of focus from far to near and intermediate distances
- Spectacle independence for intermediate and far distances
- Less visual side effects than with multifocal IOLs
- Aberration-neutral aspheric design and advanced chromatic correction for optimized contrast sensitivity

Monofocal IOLs

- Embracing ZEISS optical heritage through 4 different optical concepts
- Easy to use injector system featuring preloaded functionality
- Diverse range of lense materials and shapes to support surgeons` preferences

[1] Menucci, R. et al., Clinical outcomes and rotational stability of a 4-haptic toric intraocular lens in myopic eyes 2014, JCRS,40: 1479–1487

ZEISS AT LARA family

EDoF IOLs were designed to provide excellent vision from far through intermediate distances, inducing less visual side effects than multifocal IOLs. They are therefore ideal for patients who lead an active lifestyle and want to achieve spectacle-free vision for most activities, but are sensitive to halos and glare at night.

ZEISS AT LISA tri family

Trifocal IOLs from ZEISS enable the highest level of spectacle independence allowing patients to see clearly at all distances without visual aids.

ZEISS Toric IOLs

Toric IOLs from ZEISS are designed to correct astigmatism with more precision, resulting in better visual outcomes. ZEISS toric IOLs are an essential part of the ZEISS Astigmatism Management solution. A solution that provides surgeons with a complete toric workflow: from toric IOL selection to IOL calculation; from biometry to markerless IOL alignment.

Z CALC

Z CALC is a proprietary algorithm specifically designed for ZEISS IOLs. Providing quick and reliable online calculations for both toric and non-toric ZEISS IOLs.
It immediately predicts residual refraction for accurate outcomes, supporting you in getting satisfied patients.
Z CALC takes posterior corneal astigmatism into account – either by using IOLMaster TK readings or by using the nomogram functionality. Use Z CALC and receive accurate calculations to choose the most suitable IOL for your patient.

[1] The preloaded AT LISA tri toric 939MP is available in the diopter range: sphere -10.0 to +28.0 D, cyl. +1.0 to +4.0 D. The non-preloaded AT LISA tri toric 939M is available in the diopter ranges: sphere -10.0 to +28.0 D, cyl. +4.5 to +12.0 D and +28.5 to +32.0 D, cyl. +1.0 to +12.0 D.
[2] The preloaded AT LARA toric 929MP is available in the diopter range: spherical equivalent -8.0 to +32.0 D, cyl. +1.0 to +4.0 D. Further preselected SE/cylinder combinations are available above and below the stated SE range.
[3] The non-preloaded AT LARA toric 929M is available in the diopter ranges: spherical equivalent -4.0 to +32.0 D, cyl. +4.5 to +12.0 D. Further preselected SE/cylinder combinations are available above and below the stated SE range.
[4] The preloaded AT TORBI 709MP is available in the diopter range: sphere -10.0 to +28.0 D, cyl. +1.0 to +4.0 D. The non-preloaded AT TORBI 709M is available in the diopter ranges: sphere -10.0 to +32.0 D, cyl. +1.0 to +12.0 D.

ZEISS CT ASPHINA

Monofocal aspheric IOL made of hydrophilic acrylic (25 %) with hydrophobic surface properties. Available as aberration-neutral and aberration-correcting version to meet individual surgeons` preferences. Preloaded option available.

ZEISS CT SPHERIS

Monofocal spheric IOL made of hydrophilic acrylic (25 %) with hydrophobic surface properties.

* Please refer to our web site www.zeiss.com/iol for the most up-to-date references. Some IOLs are not for sale in all countries.

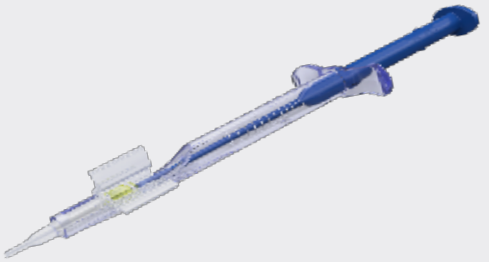
Fully preloaded injector system



Only available as fully preloaded injector system,
not as stand-alone injector

ZEISS CT LUCIA 221P
ZEISS CT LUCIA 621P/PY

ZEISS CT LUCIA

The patented asphericity concept of the ZEISS CT LUCIA mitigates against potential decentration issues and delivers confidently excellent visual outcomes. Provided in a new and improved fully preloaded injector for easy and intuitive cataract workflow. The architecture of the IOL offers very stable positioning in the capsular bag for consistent and excellent performance.

ZEISS Injectors

Reliable and easy to use

A selection of high-end injectors from ZEISS has been aligned with the requirements of our IOL portfolio. It provides a choice of different injector formats based on usability, diopter power and workflow preferences. Preloaded or fully preloaded options are available to optimize the surgical workflow and allow micro-incision surgery.

Preloaded Injector	Single-Use Injector	Reusable Injector
