Zen favorites buttons & associated hardware settings account transfer

Zen 2 has 2 file locations needed to get the favorites buttons transferred to other accounts.
The files need to be copied into the same corresponding folder into other users accounts.

They are:
1.) The Hardware Settings files
The hardware settings files with extension .*czhws* which the buttons are associated with:
These files are I assume in the "MASTER ACCOUNT" under user: Documents\Carl
Zeiss\ZEN\Documents\Hardware Settings
The .*czhws* files must be directly inside the Hardware Settings folder and not nested one folder level
deeper or they will not be seen by Zen.

2.) The Favorites Buttons
The buttons themselves as part of the software configuration settings:
In the file named: InitializationSettings.config
Located at: USERNAME\AppData\Roaming\Carl Zeiss\ZEN\DefaultWorkspace

3.) Possible error
If you copy these to the other users and get an error at Zen startup in these new user accounts that points
to the following file: ServiceInitializationSettings.config
It is here C:\ProgramData\Carl Zeiss\ZEN
You should edit this file from your "Master" admin account and edit it's permissions so that all users have
full access to the file.

Right click on file choose properties: choose the security tab hit edit highlight the users group in the upper
window area and hit allow full control. Hit apply and ok and that should resolve any further errors

If you have questions please call 1-800-509-3905 or Email support@zeiss.com
