

Sun protection that reflects your style.

ZEISS DuraVision Mirrors

Add a stylish ZEISS DuraVision Mirror treatment to your sun or PhotoFusion lenses and protect them with ZEISS DuraVision Sun back-side AR.

Seeing beyond

ZEISS DuraVision Mirrors

ZEISS DuraVision Mirror Coatings help you cultivate a unique look – and aren't just fashionable, but also entirely functional: ZEISS Mirror coatings provide crystal-clear vision with significantly reduced reflections improving visual comfort in extreme light conditions as well as when you're shopping or playing sports.

Two special coatings make this possible:

An anti-reflective coating on the back surface of the lens and a mirror-coating on the front. Plus, both sides are easy to clean.

- ZEISS DuraVision Mirror coatings are available in **eight standard colors** and **five flash colors** to ensure fabulous results.

ZEISS DuraVision Standard Mirrors.

Standard mirrors are best when combined with a **polarized, tinted or gradient tinted lens**.

They offer a high reflection and are a great option for either fashion frames or active sports frames.

ZEISS Urban

ZEISS URBAN Fashion mirrors offer a distinctive new look for trendy Rx lens wearers.

ZEISS DuraVision Mirror Bronze

ZEISS DuraVision Mirror Blue

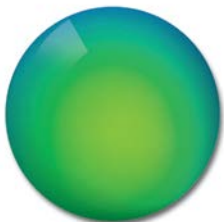

ZEISS DuraVision Mirror Gold

ZEISS DuraVision Mirror Cool Blue

ZEISS Active

ZEISS ACTIVE Functional mirrors provide performance and functionality for sports and active lifestyles.

ZEISS DuraVision Mirror Green

ZEISS DuraVision Mirror Red

ZEISS DuraVision Mirror Silver

ZEISS DuraVision Mirror Strong Blue

ZEISS DuraVision Flash Mirrors

ZEISS DuraVision Flash mirrors offer a subtle, flash-to-mirror effect with less than **10% residual reflex in five trendy, fashionable colors**. Try these mirrors on your favorite **tints, gradient tints, polarized, photochromic or even clear lenses**. The options are endless.

ZEISS Urban

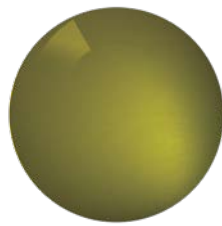

ZEISS Urban Flash mirrors offer a fashion forward look with lower reflectance than standard mirrors.

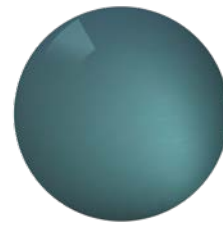

ZEISS DuraVision Mirror White

ZEISS DuraVision Flash Sapphire

ZEISS DuraVision Flash Amber

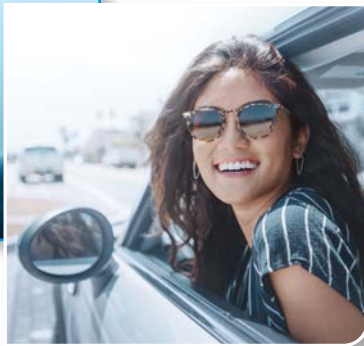

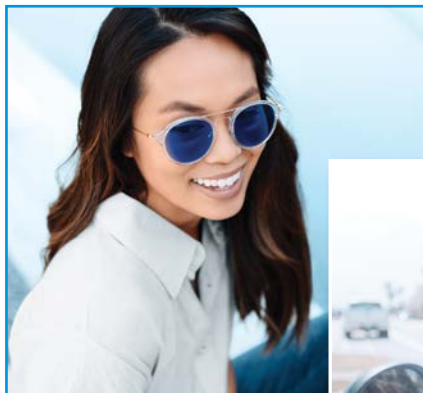

ZEISS DuraVision Flash Jade

ZEISS DuraVision Flash Ruby

Mix and match any **ZEISS DuraVision Flash Mirror** with any **ZEISS PhotoFusion color** to create a unique look.

Fast dark.
Fast clear.

ZEISS PhotoFusion

They **darken extra fast** and **fade back to clear up to 2 times faster** than leading photochromic lenses.*

* Average performance for ZEISS PhotoFusion self-tinting lenses compared to the leading photochromic lenses in polycarbonate and high-index. Performance will vary according to lens material, temperature, UV exposure and light conditions.

ZEISS – The trusted leader in precision optics.

Where **PASSION** drives **INNOVATION**.

As a pioneer in the field of optics, ZEISS continues to enable human ambitions in many fields including:

- Eyeglass lenses
- Medical equipment
