

Protecting your eyes while reflecting your style.

ZEISS DuraVision Mirror Coatings

100% UV
Protection

DuraVision® Mirror Coatings by ZEISS.

- ZEISS tinted lenses provide 100% UV protection
- Comfort for all light intensities and eye sensitivities
- Backside anti-reflective coating to give you excellent clear vision

ZEISS DuraVision Mirror Coatings.

ZEISS DuraVision Mirror Coatings help you cultivate a unique look – and aren't just fashionable, but also entirely functional: ZEISS Mirror coatings provide crystal-clear vision with significantly reduced reflections improving visual comfort in extreme light conditions as well as when you're shopping or playing sports.

Two special coatings make this possible: an anti-reflective coating on the back surface of the lens and a mirror-coating on the front.

ZEISS DuraVision Mirror coatings are available in eight different exciting colors to ensure fabulous results.
