# ZEISS Pre Visit Prep App

A pre-exam quiz based on a patient's daily visual habits and lifestyle that results in individualized lens solutions from ZEISS. Embed the quiz on your website to educate patients, speed up the lens selection process and drive more traffic to your business.

## Instructions

To add the embed code in your website, follow these simple steps:

1. Locate the section of your web page where you want the app to appear.
  - a. We recommend displaying it on your Home page, which is usually named "default" or "index."
  - b. We recommend placing the app within the widest body section of your website, rather than a narrow sidebar on the right side of the screen.
  - c. The code must be placed after the <body> tag and before the </body> of your website. The code cannot be placed in the <head> section.
2. Copy and paste the following iframe into your HTML code: `<iframe width="600" height="300" src="MailScanner has detected a possible fraud attempt from "eur01.safelinks.protection.outlook.com" claiming to be MailScanner has detected a possible fraud attempt from "eur01.safelinks.protection.outlook.com" claiming to be https://previsitprep.com/"></iframe>`
  - a. You can modify the Width and Height dimensions, to ensure the app aligns with your site layout. However, we recommend that you use the 600x300 dimensions.
3. Save the file that you made the changes to.
4. Share it via social media, email, etc. to drive people to your site.
