

Contact lenses -

everything you need to know about the alternative to glasses

It doesn't always have to be a new pair of glasses – sometimes contact lenses can also deliver optimal vision: on holiday, when playing sports, for purely cosmetic reasons or even for health reasons, contact lenses are an appealing alternative to glasses. But this isn't always the case. Most contact lens wearers reach for their glasses in the evenings to give their eyes a chance to relax. And did you know that even when wearing contact lenses with integrated UV protection, you should also use sunglasses to avoid radiation damage? Contact lenses with UV protection don't completely cover the eyes and so don't provide sufficient protection. Read on to find out everything you need to know about contact lenses and how you can get exceptional vision without wearing glasses.

Contact lenses or glasses?

Both are a good choice. It's really a matter of taste – and a matter of what's good for your eyes
