

Polarised Lenses by ZEISS

ZEISS precision sunglass lenses with polarisation filter

Who hasn't experienced the glare of reflected sunlight on wet or shiny surfaces? This glare can have a negative impact on our vision, particularly while driving. It's a good thing that an effective remedy is available: **ZEISS sunglass lenses with polarisation filter reliably counteract glare.**

Polarised light reflections can lead to disturbing glare. This is effectively filtered by polarising lenses from ZEISS. Vertical micro-mesh structures eliminate the horizontally oscillating element of light which is responsible for a great deal of glare. A further key advantage is more sharply focussed vision. Contours become clearer; vision in bright sunlight is perceived as considerably more relaxing and less fatiguing. In other words, these spectacle lenses don't just protect your eyes against the sun – they also ensure improved vision without irritating glare.

Polarised

Polarised are polarising sunglass lenses by ZEISS in the standard colours of brown, grey and pioneer (grey-green) - 85%.

Color: Brown pol 85%

Color: Grey pol 85%

Color: Pioneer pol 85%

SkyPol

SkyPol combines a polarisation filter with contrast enhancing > [Skylet® tinting](#) for a unique visual experience in challenging light conditions.

SkyPol Fun

SkyPol Road

SkyPol Sport

The benefits for the wearer

- ✓ Polarising filter against irritating reflections
- ✓ Optimised glare protection
- ✓ 100% solar UV protection
- ✓ Light and comfortable to wear
- ✓ Attractive range of colours with the benefits of the Skylet® colour:
Fun, Road, Sport
