

Magnifying visual devices

When glasses aren't enough

Sometimes glasses just aren't enough. ZEISS offers you a broad spectrum of magnifying visual devices. These support not only low vision patients by providing them with individually fitted magnifiers, magnifying or telescopic spectacles or with monocular hand-held telescopes, but also people who need to see the tiniest details in their jobs, e.g. dentists, jewellers, beauticians or surgeons. For these fields of application, ZEISS offers individually fitted teleloupe spectacles and head-worn loupes with or without illumination systems which enable comfortable, exact and unimpaired work down to the very last detail.

How you benefit

Good vision for everyday tasks and challenges

- **Individualized visual solutions for low vision patients**, tailored to their personal vision requirements in everyday life and their remaining vision potential – e.g. vision loss due to retinal diseases that require special solutions which exceed the possibilities of standard eyewear or contact lenses.
- **Individualized vision solutions to provide professional users** for whom good vision is simply not good enough in their highly skilled work – such as doctors and engineers. Often even a few fractions of a millimetre can determine success or failure.
- The product spectrum includes different optical systems for hand-held use whereas others are intended to be integrated into or attached to spectacles – with or without illumination systems.
- Provide each wearer with the best visual performance using a magnifying visual device.
- Convenient operation tailored to each situation.
- Excellent image quality with a maximum field of view.

Magnifying visual devices: who for?

An overview of the product line and its applications

For all users: magnifiers

VisuCard and pocket magnifiers

Ideal for outdoor use: the small dimensions make it possible to distinguish even the finest detail any time, any place Their high dioptic powers make the VisuCards and pocket magnifiers from ZEISS suitable for persons who suffer from severe visual impairments.
