

# Smart sunglass lenses that adapt to changing light.

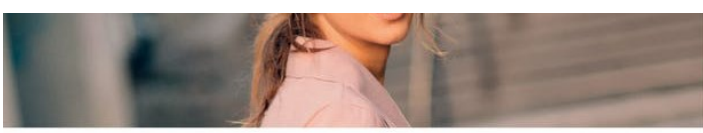

## ZEISS AdaptiveSun Solutions

NEW!

[ZEISS AdaptiveSun Solutions](#)[How do smart sunglasses from ZEISS work?](#)[Related Products](#)[Find optician](#)

ZEISS AdaptiveSun Solutions are sunlenses designed to automatically adjust their colour intensity depending on UV exposure, giving you full UV and glare protection. It is available in four fashionable colours – brown, grey, pioneer and blue – in solid or gradient tints that provide protection in medium to high light intensity.

Sunglasses provide UV protection, glare reduction and comfortable vision. But even when wearing them we often struggle to see clearly because of constantly changing light conditions. The lenses can either become too dark in shady areas or too light in bright sunlight. We then tend to take them off, leaving our eyes unprotected.

## ZEISS AdaptiveSun Solutions.

Smart sunglass lenses for a convenient, fashionable lifestyle.

### Fast

ZEISS AdaptiveSun sunglass lenses adapt to changing light fast – for more convenience. Darkens in 18–35 seconds<sup>1</sup>.

### Dark and darker

ZEISS AdaptiveSun sunglass lenses become very dark outside in sunlight – for optimum vision at all times.

### Colour consistency

ZEISS AdaptiveSun sunglass lenses demonstrate excellent colour consistency – for natural sight.

### Glare reduction

ZEISS AdaptiveSun sunglass lenses are available with polarization for extreme light conditions.
