

## Driving & Digital Life

Always on the go? Whether you're driving or using mobile devices, we can help you see better.

Whether you're driving or looking at your cell phone, today's world makes many demands on your eyes. Smartphones, laptops and other devices are changing the way we see, redefining the near range, and causing digital eye strain. But what do we even mean these days when we talk about good vision – and how can we keep improving it? What's the advantage of a pair of glasses designed for driving? How can glasses designed to combat digital eye strain help when we're surfing the net or looking at our smartphones? Read on to find out all about modern and "digital" vision, and read our tips for both novice and advanced progressive lens wearers.

### The best glasses for driving - Reach your destination safely

Every time we drive, our eyes are called on to do some heavy lifting: seeing in poor light, blinding sunlight, fog or on wet or reflective roads - not to forget the many other road users, signs and information they have to note. However, the right eyeglass lenses can turn even long and frequent drives into pleasant and, most importantly, safe

### What's the best way of developing eyeglass lenses tailored to our digital lifestyle?

BETTER VISION interviewed Timo Kratzer from ZEISS Vision Care to discover more about the development of Digital Lenses
