Good vision at work – what you should bear in mind.

Good vision is important at work. Whether you're a programmer or a beautician, there are now plenty of vision options that have been optimized for various workplace needs and can deliver outstanding vision in unique conditions. This not only includes glasses for extraordinary job-related demands, such as those faced by pilots, but also special solutions for those in professions where even the smallest details make a big difference – such as for dentists and jewelers. There is even help for those with visual impairments, with the aid of magnifiers and magnifying glasses. Computer glasses can help you see better and in a more relaxed way at work. Read on to find out everything you need to know about better vision at work.

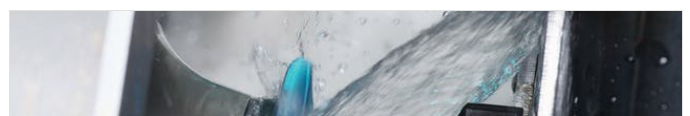

Computer glasses: just the thing for the workplace
